

TSEBO SITE SOLUTIONS

# REMOTE SITE AND FACILITY MANAGEMENT SOLUTIONS

## INTRODUCTION

With cross-continental reach and experience in constructing and managing successful remote camps in 25 countries across East, Central, Southern and West Africa, Tsebo Site Solutions (TSS) challenges the boundaries of what is possible for business in Africa.

Regardless of how limited the existing infrastructure or supply connections, TSS will find a way for your Africa investment to deliver a return.

## THE CHALLENGE

Most often the design and construction of a remote camp starts with a simple GPS co-ordinate and is completely cut off from the outside world.

Difficult accessibility due to poor or non-existent roads, lack of electricity and water infrastructure and hard to find, remote locations are all part of TSS's everyday challenges in the remote construction industry.

## OUR SOLUTION

With more than 20 years of experience in the remote-camp business, TSS has learnt how to establish reliable line and communication for technical support in hard-to-reach locations. Whatever the challenge, we have the knowledge and "can-do" attitude to optimise the performance of your site.

We are deeply committed to Health, Safety and Environmental policies and procedures to ensure healthy, safe working environments and are ISO 22000:2005 certified with full HACCP and OHSAS 18001:2007 accreditation. Our food-production and service conform with Good Hygienic Practices (GHP) as per Codex standards.

We are committed to uplifting the communities in which we operate. Our Enterprise Supplier Development model is designed to facilitate integration between our clients and communities to ensure that they profitably participate in the remote-camp supply chain, thus empowering local SMMEs and ensuring a long-term CSI legacy after the project is completed.

## THE BENEFITS

- ✓ Design, development and mobilisation of remote camps
- ✓ Turnkey camp-management solutions (housekeeping, catering, cleaning and recreation)
- ✓ Facilities management
- ✓ Supply-chain solutions
- ✓ Maintenance
- ✓ Security
- ✓ Grounds keeping, gardening and landscaping
- ✓ Energy optimisation

## WHERE WE OPERATE

- ✓ South Africa
- ✓ Lesotho
- ✓ Botswana
- ✓ Eswatini

### GET IN TOUCH

If you wish to integrate Tsebo with your current catering hub, we would be happy to engage further.
